# STATE OF CALIFORNIA CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY STATE WATER RESOURCES CONTROL BOARD

### **DIVISION OF WATER RIGHTS**

## PERMIT FOR DIVERSION AND USE OF WATER

	PERMIT 2	1012			· .			
2	Terrence A. and Paula L. Borge 2205 Loma Heights Road Napa, CA 94558							
filed on August 25, 1998, ha (SWRCB) SUBJECT TO PR								
Permittee is hereby authori	zed to divert and use v	vater as follo	)ws:					
1. Source of water		Tributary to						
Unnamed Stream		Sarco Creek	thence Milli	ken Cree	<u>k</u>			
thence Napa River thence San Pablo Bay								
		***		,	<del></del>			
			- 11					
within the County of Napa								
2. Location of point of dive	rsion							
By California Coordinate System in Zone 2	40-acre subdivision of public land survey or projection thereof	Projected Section	Township	Range	Base and Meridian			
POD #1; North 237,500 feet	SW¼ of SE¼	36	6N	4W	MD			

and East 1,928,250 feet

3. Purpose of use	4. Place of use	Projected Section	Township	Range	Base and Meridian	Acres
Domestic	SW¼ of SE¼	36	6N	4W	MD	14.5
Irrigation	NW¼ of NE¼	01	5N	4W	MD	2.5

The place of use is shown on map on file with the SWRCB.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 20 acre-feet per annum to be collected from **December 15** of each year to **March 31** of the succeeding year.

(0000005C)

6. This permit does not authorize collection of water to storage outside of the specified season to offset evaporation and seepage losses or for any other purpose.

(0000005I)

- 7. The maximum rate of diversion to offstream storage shall not exceed 75 gallons per minute. (0000005J)
- 8. The capacity of the reservoir covered under this permit shall not exceed 20 acre-feet. (0000005N)
- 9. Complete application of the water to the authorized use shall be made by December 31, 2010. (0000009)
- 10. Permittee shall install and maintain an outlet pipe of adequate capacity in the dam as near as practicable to the bottom of the natural stream channel in order that water entering the reservoir which is not authorized for appropriation under this permit can be released. Before starting construction, permittee shall submit plans and specifications of the outlet pipe, or alternative facility, to the Chief of the Division of Water Rights for approval. Before storing water in the reservoir, permittee shall furnish evidence, which substantiates that the outlet pipe has been installed in the dam. Evidence shall include photographs showing completed works or certification by a registered Civil or Agricultural Engineer.

(0050043A)

11. Permittee shall install and maintain devices satisfactory to the SWRCB to measure the rate and quantity of water diverted into the reservoir from Unnamed Stream tributary to Sarco Creek, and water released from or flowing out of the reservoir.

(0060046)

12. From April 1 to December 14, all natural flow will be bypassed.

For the protection of fishery resources, Permittee shall, during the prescribed collection season of December 15 through March 31, bypass a minimum of 18 gallons per minute. The total stream flow shall by bypassed whenever it is less than the designated rate. No diversion shall take place under this permit if the flow in the Unnamed Stream is, or would be reduced by such diversion, below the designated rate.

(0140400)

13. Prior to issuance of the permit, the applicant shall submit a compliance plan that is acceptable to the Chief of the Division of Water Rights that will insure compliance with the bypass terms described above. If feasible, the applicant shall develop a "passive" bypass system (i.e. no intervening regulation of the bypass flow is required by the applicant) that will ensure compliance with these terms. The Division of Water Rights will forward a copy of the compliance plan to the Department of Fish and Game for review and comment.

(0050400)

14. Under the exercise of all basis of rights, a maximum of 20-acre feet will be used annually.

(0070900)

# ALL PERMITS ISSUED BY THE STATE WATER RESOURCES CONTROL BOARD ARE SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

- (A) Permittee shall maintain records of the amount of water diverted and used to enable the SWRCB to determine the amount of water that has been applied to beneficial use pursuant to Water Code section 1605.
- (B) The amount authorized for appropriation may be reduced in the license if investigation warrants.
- (C) Progress reports shall be submitted promptly by permittee when requested by the SWRCB until a license is issued.
- (D) Permittee shall allow representatives of the SWRCB and other parties, as may be authorized from time to time by said SWRCB, reasonable access to project works to determine compliance with the terms of this permit.

(E) Pursuant to California Water Code sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution article X, section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

- (F) The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the SWRCB if, after notice to the permittee and an opportunity for hearing, the SWRCB finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the SWRCB finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.
- (G) This permit does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future,

Permit 21012

under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the permittee shall obtain an incidental take permit prior to construction or operation. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

#### This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Dated: NOV 2 9 1999
